

Downtown Construction Activities

Proposed work activities for the week of March 28th, 2021

- The contractor at the Generals Bridge project will be removing concrete forms at north plinths and begin installing a new underground electrical system including new handholes for future lighting.
- The contractor at the General Dunford Drive project will finish installing the remaining section of permeable pavers within the plaza, finish installing plantings behind the serpentine bench, install bituminous sidewalk, concrete sidewalk, and pave a portion of the parking lot adjacent to Revere Rd. In addition, the contractor will finish installing the streetlights along the new roadway. Temporary barriers remain in place on Hancock St for traffic re-alignment while the project is being constructed. Pedestrians should continue crossing the street at the crosswalk before this area.
- At the McConville Way project the contractor will continue construction of the north and south streetscape aside the new roadway. The streetscape work includes the installation of trees within the planter curbs, mud slab, and brick pavers at the SAR building entrance. The contractor will continue installing precast concrete pavers within the alleyway between 1495 Hancock St and 1515 Hancock St buildings. The alleyway remains closed during construction. In addition, the contractor will continue installing granite curbing, pave a portion of Messina parking lot, and reinstall parking gates. At the future pocket parks, the contractor will continue installing park granite curbing, granite blocks at future benches, begin installing park pavers, install new waterproofing at park fountain, and install new drainage improvements at Cliveden Place pedestrian entrance. Along Granite St, the contractor will begin installing new fence post foundations at the new landscape islands. Traffic will be reduced to one lane during this time.
- The demolition of the 100 Parking Way building will begin this week. The contractor will be installing temporary fencing around the building during construction. There remains no parking along McConville Way and Parkingway.

(The photo on the above left shows new mud slab being installed in the new park adjacent to the 1515 Hancock St Building and the photo on the above right shows new trees being installed in planter beds along McConville Way.)
